PhD THESIS WORK

A significant portion of electrical energy gets wasted inside buildings either due to the faulty appliances or abnormal user behavior. The goal of the thesis was to use smart meter data and propose automated approaches which can detect energy wastage instances timely and hence reduce energy wastage.

MASTER'S DISSERTATION

Title: "Localization in Wireless Sensor Networks", *Advisor:* Prof. A. K. Turuk
This thesis presents techniques for localizing mobile wireless sensor nodes. The main focus was to reduce the number of beacon nodes required for localizing sensor network.
