PhD THESIS WORK

A significant portion of electrical energy gets wasted inside buildings due to abnormal user behavior and faults in electrical appliances. The goal of my thesis is to propose automated approaches which can identify such instances timely.

MASTER'S DISSERTATION

Title: "Localization in Wireless Sensor Networks", Advisor: Prof. A. K. Turuk

This thesis presents three different techniques for localizing both static as well as mobile wireless sensor nodes. The main focus of the work was to reduce the number of beacon nodes required for localizing sensor network.
